FLEYG PLUS®

HOW DOES FLEYG PLUS WORK

Steel plates are indispensable in road construction so that vehicles, bicycles and pedestrians can bridge construction site obstacles.

Up to now, steel plates were mostly built by filling up concrete ramps. This is time-consuming and expensive. In addition, the steel plates built in this way cause considerable noise when crossing.

The **FLEYG PLUS** access ramp is mainly made of rubber. The noise dampening effect is already integrated into the material. **FLEYG PLUS** is water-repellent and non-slip. With the reflective markings it is also more visible.

The **FLEYG PLUS** is equipped with eight high-performance magnets that allow the specialist staff to attach the access ramp directly to the steel plate. The entire steel plate including **FLEYG PLUS** can be lifted, moved or transported away with each work step.

BENEFITS OF FLEYG

Quick and easy to lay

Can be reused

Cost-saving compared to ramps made using a coating

SAFETY - Highly visible thanks to reflective markings

Fleyg is a Europe-wide patented product from FLEYG AG

FLEYG PLUS®

Version with asphalt

Version with FLEYG

Price	PER USE EUR 30.00 - EUR 40.00 / m ¹ (Pay, materials, inventory, external services, waste disposal)	CAN BE USED AGAIN AND AGAIN EUR 195.00 / m ¹ Acquisition costs are recouped after just five uses!
Usability	Asphalt can only be used once.	Fleyg is designed to be used more than 200 times
Flexibility	Asphalt must be organised, ordered, transported and installed.	Fleyg can be laid quickly and used flexibly
Safety	<ul style="list-style-type: none">• Trip hazard for pedestrians and cyclists• Not easily visible to all road users	<ul style="list-style-type: none">• Reflectors ensure safety• No tripping• Increased slip resistance• Environmentally friendly• Easy to lay

FLEYG PLUS®

DATA SHEET

Type	FLEYG 100 / FLEYG 75
Material	<ul style="list-style-type: none">• Recycled rubber specially designed and created in-house with tensile/pressure-bearing properties• High performance magnet
Surface	<ul style="list-style-type: none">• Water-repellent with pearl texture• Non-slip light reflectors
Patents	Fleyg AG, Bäumleingasse 22, 4051 Basel
Technical Details	FLEYG 1000 x 400 x 42 mm / 12 kg FLEYG 750 x 400 x 42 mm / 9 kg Magnet 24mm diameter
Suitable for road plates from 2.0 to 4.0 cm
