

HOW DOES FLEYG WORK

Steel road plates are indispensable for road construction to guide vehicles, bicycles and pedestrians safely over obstacles on construction sites.

Previously, steel road plates were generally installed by pouring concrete ramps. This is time-consuming and expensive, and steel road plates installed using this method make a significant amount of noise when crossed.

THE SOLUTION IS **FLEYG®**

The **FLEYG**-Ramp from Beyeler & Fischer is made predominantly from rubber, which offers a noise-dampening effect. **FLEYG** is water-repellent and non-slip. Its reflective markings also improve its visibility.

BENEFITS OF FLEYG

Quick and easy to lay

Can be reused

Cost-saving compared to ramps made using a coating

SAFETY - Highly visible thanks to reflective markings

Fleyg is a Europe-wide patented product from FLEYG AG

FLEYG AG – Bäumleingasse 22 – 4051 Basel – sascha@fleyg.ch – www.fleyg.ch

FLEYG®

Version with asphalt

Version with FLEYG

Price	PER USE EUR 30.00 - EUR 40.00 / m ¹ (Pay, materials, inventory, external services, waste disposal)	CAN BE USED AGAIN AND AGAIN EUR 195.00 / m ¹ Acquisition costs are recouped after just five uses!
Usability	Asphalt can only be used once.	Fleyg is designed to be used more than 200 times
Flexibility	Asphalt must be organised, ordered, transported and installed.	Fleyg can be laid quickly and used flexibly
Safety	<ul style="list-style-type: none">• Trip hazard for pedestrians and cyclists• Not easily visible to all road users	<ul style="list-style-type: none">• Reflectors ensure safety• No tripping• Increased slip resistance• Environmentally friendly• Easy to lay

FLEYG®

DATA SHEET

Type	FLEYG 100 / FLEYG 75 / FLEYG 50 corner
Material	Recycled rubber specially designed and created in-house with tensile/pressure-bearing properties
Surface	<ul style="list-style-type: none">• Water-repellent with pearl texture• Non-slip light reflectors
Patents	Beyeler & Fischer GmbH
Technical Details	FLEYG 1000 x 400 x 42 mm / 12 kg FLEYG 750 x 400 x 42 mm / 9 kg FLEYG 250 x 250 x 42 mm / 9 kg
Features	<ul style="list-style-type: none">• Less noisy than driving over steel plates• Fewer trip hazards (approx. 4mm lip)• Visibility of reflectors ensures safety• Sustainable and environmentally friendly• Can be reused again and again
